

GenetiQ Digital Twin Global Launch

Stakeholder Pitch Materials

The New Era of Personal Health

The GenetiQ Digital Twin

GenetiQ is not just a diagnostic tool; it is the foundation of predictive, precision medicine. By integrating multi-omics data, AI-driven predictive modeling, and a deep learning knowledge graph, GenetiQ will redefine healthcare, shifting from reactive disease treatment to proactive, individualized health optimization.

Scalability Through Partnerships

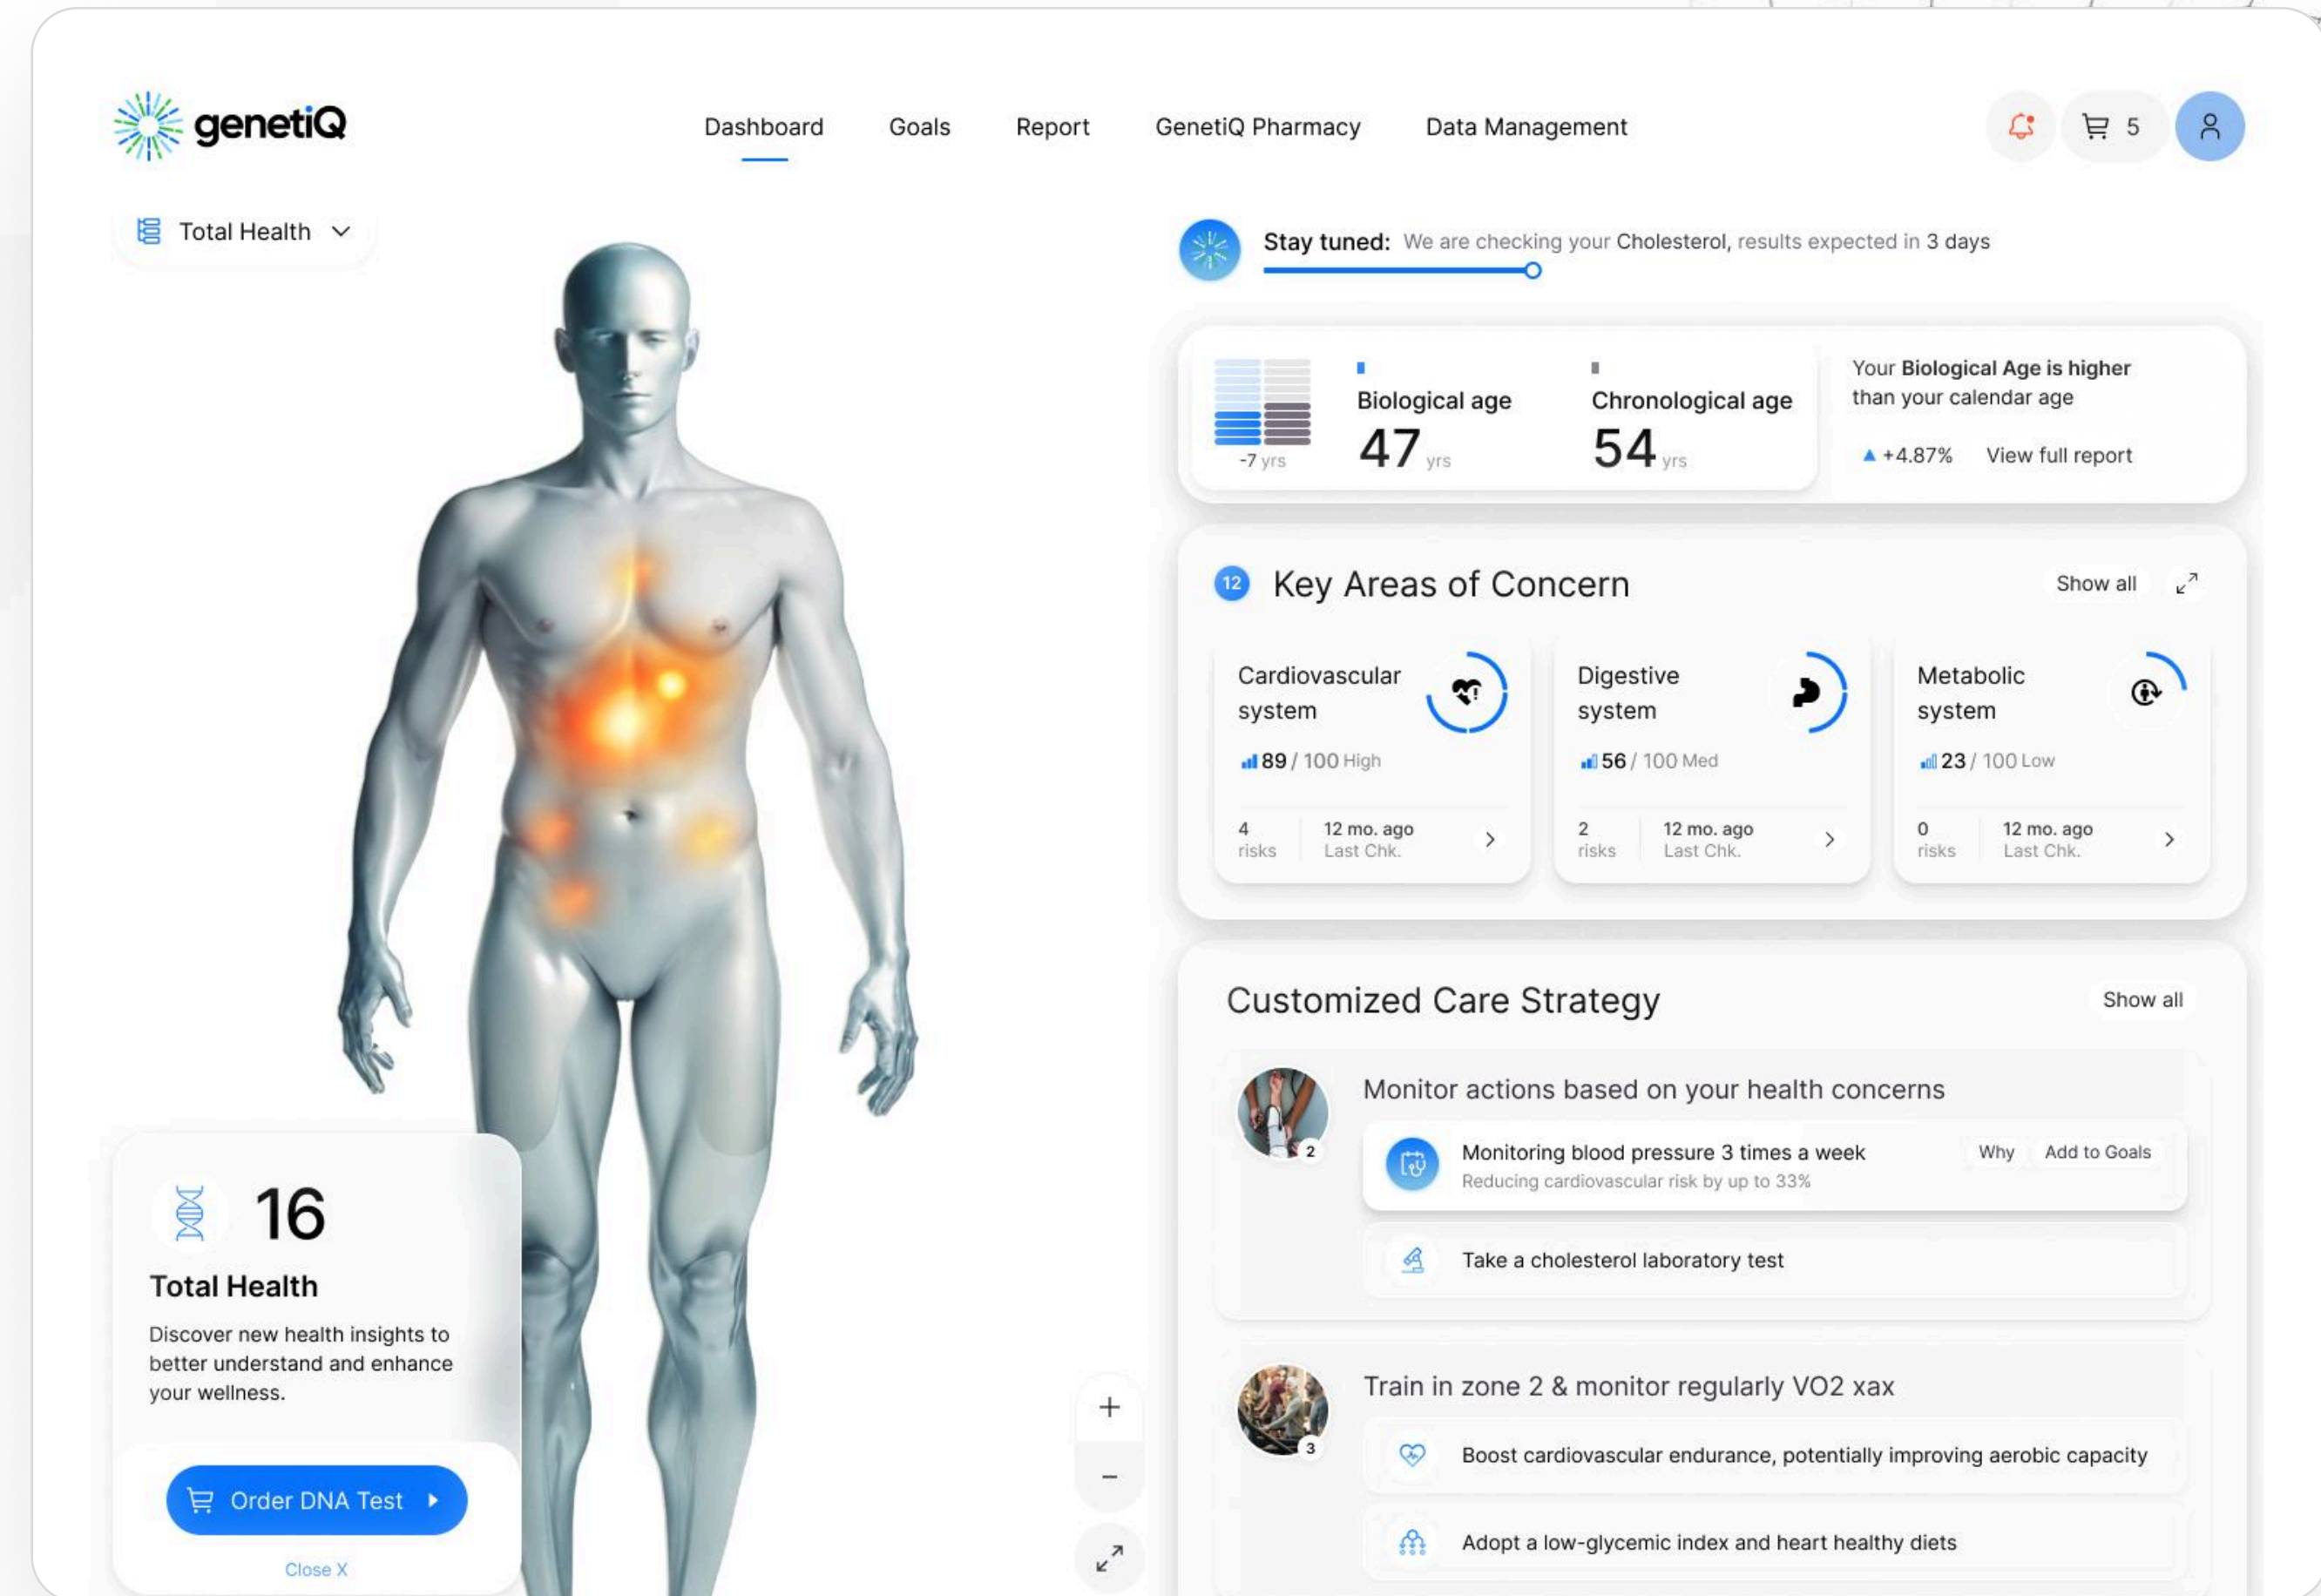

Instead of building standalone labs, we activate global lab networks to leverage existing infrastructure.

A Data-Driven, AI-Powered Knowledge Engine

Our deep learning model aggregates and refines the world's most advanced assays to continuously improve predictive insights.

A Monetizable Asset

This platform is not just about diagnostics, it is a revenue-generating intelligent digital ecosystem.

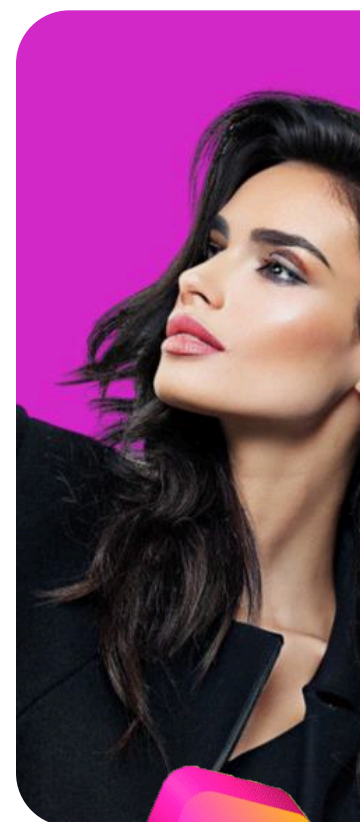

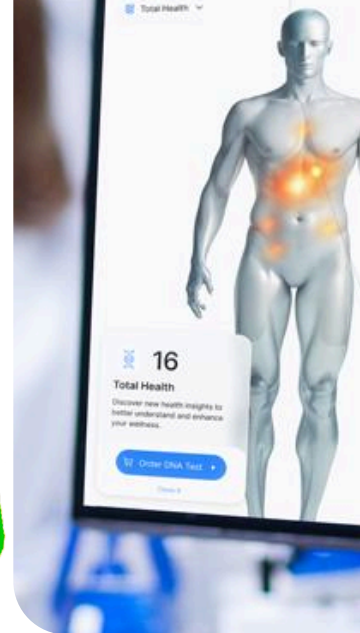

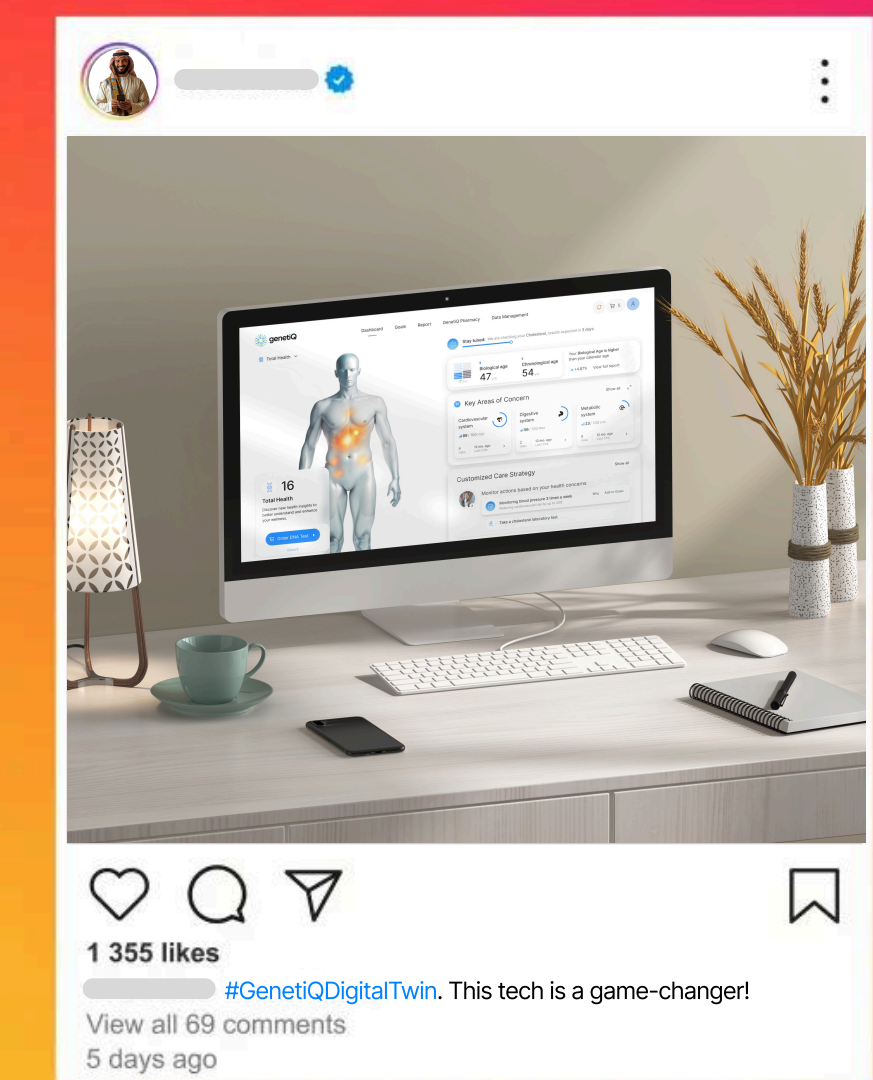

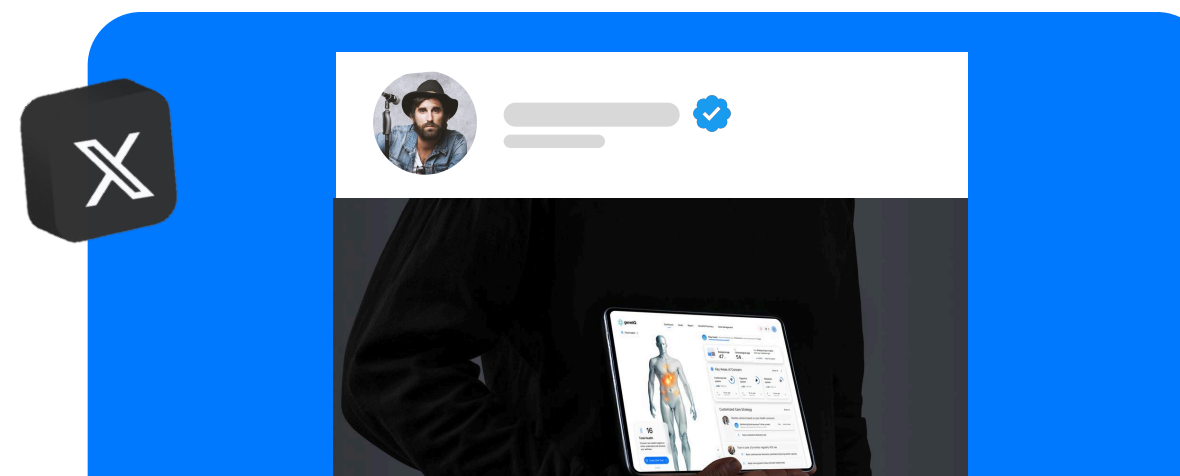

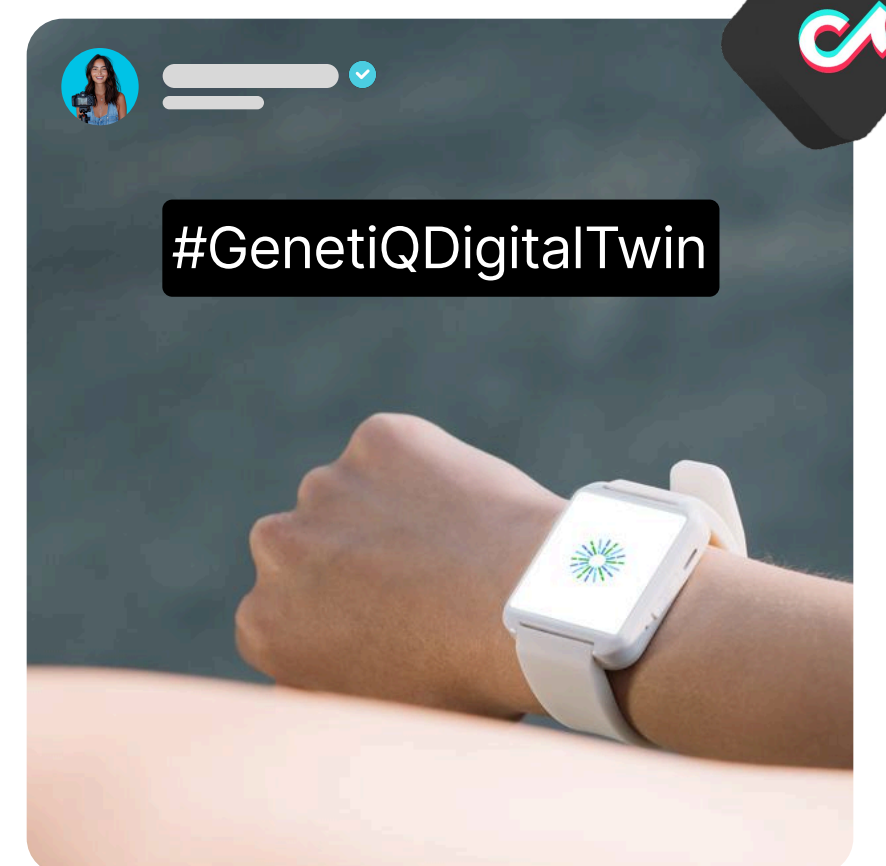

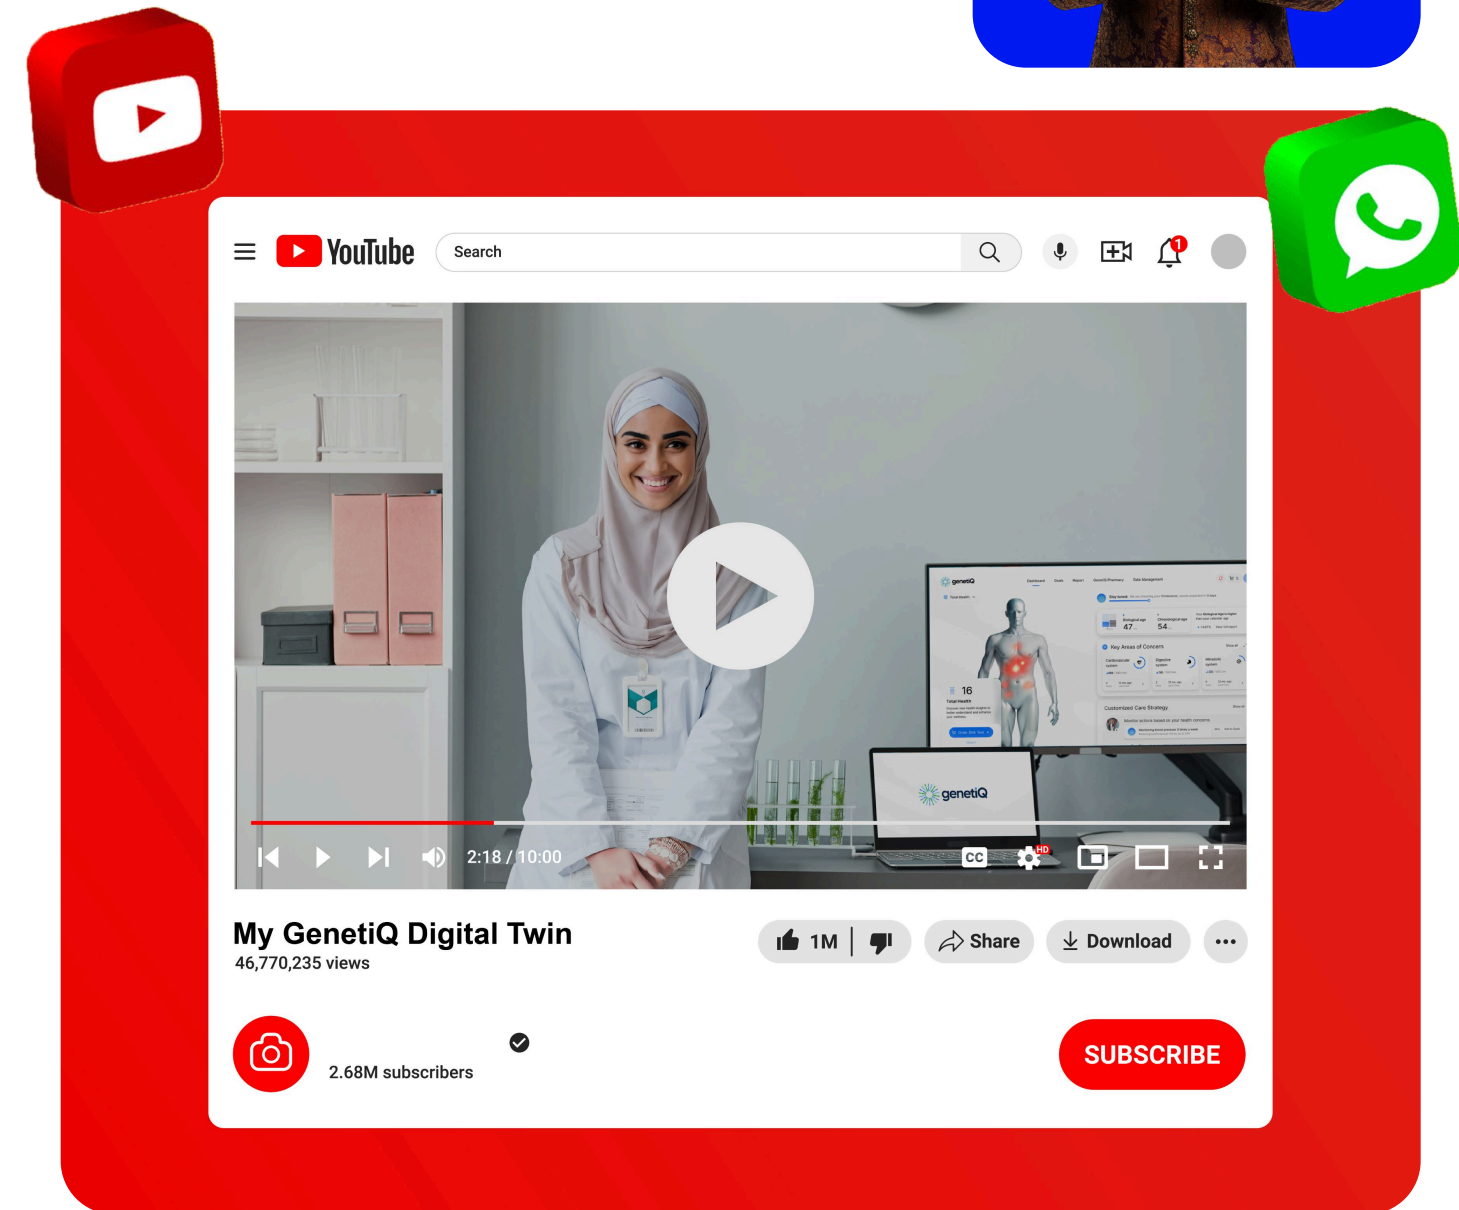

Be the face of Health Revolution

Why It Matters:

- Exclusive early access to the most advanced personalized health technology
- Community impact, educate and empower millions about precision medicine.
- Paid partnerships, affiliate commissions, and long-term brand association
- Personalize health like never before. GenetiQ Digital Twin enables individuals to optimize longevity, track biological changes, and take control of their well-being.

GenetiQ Digital Twin is revolutionizing health tracking and longevity. You can lead the movement.

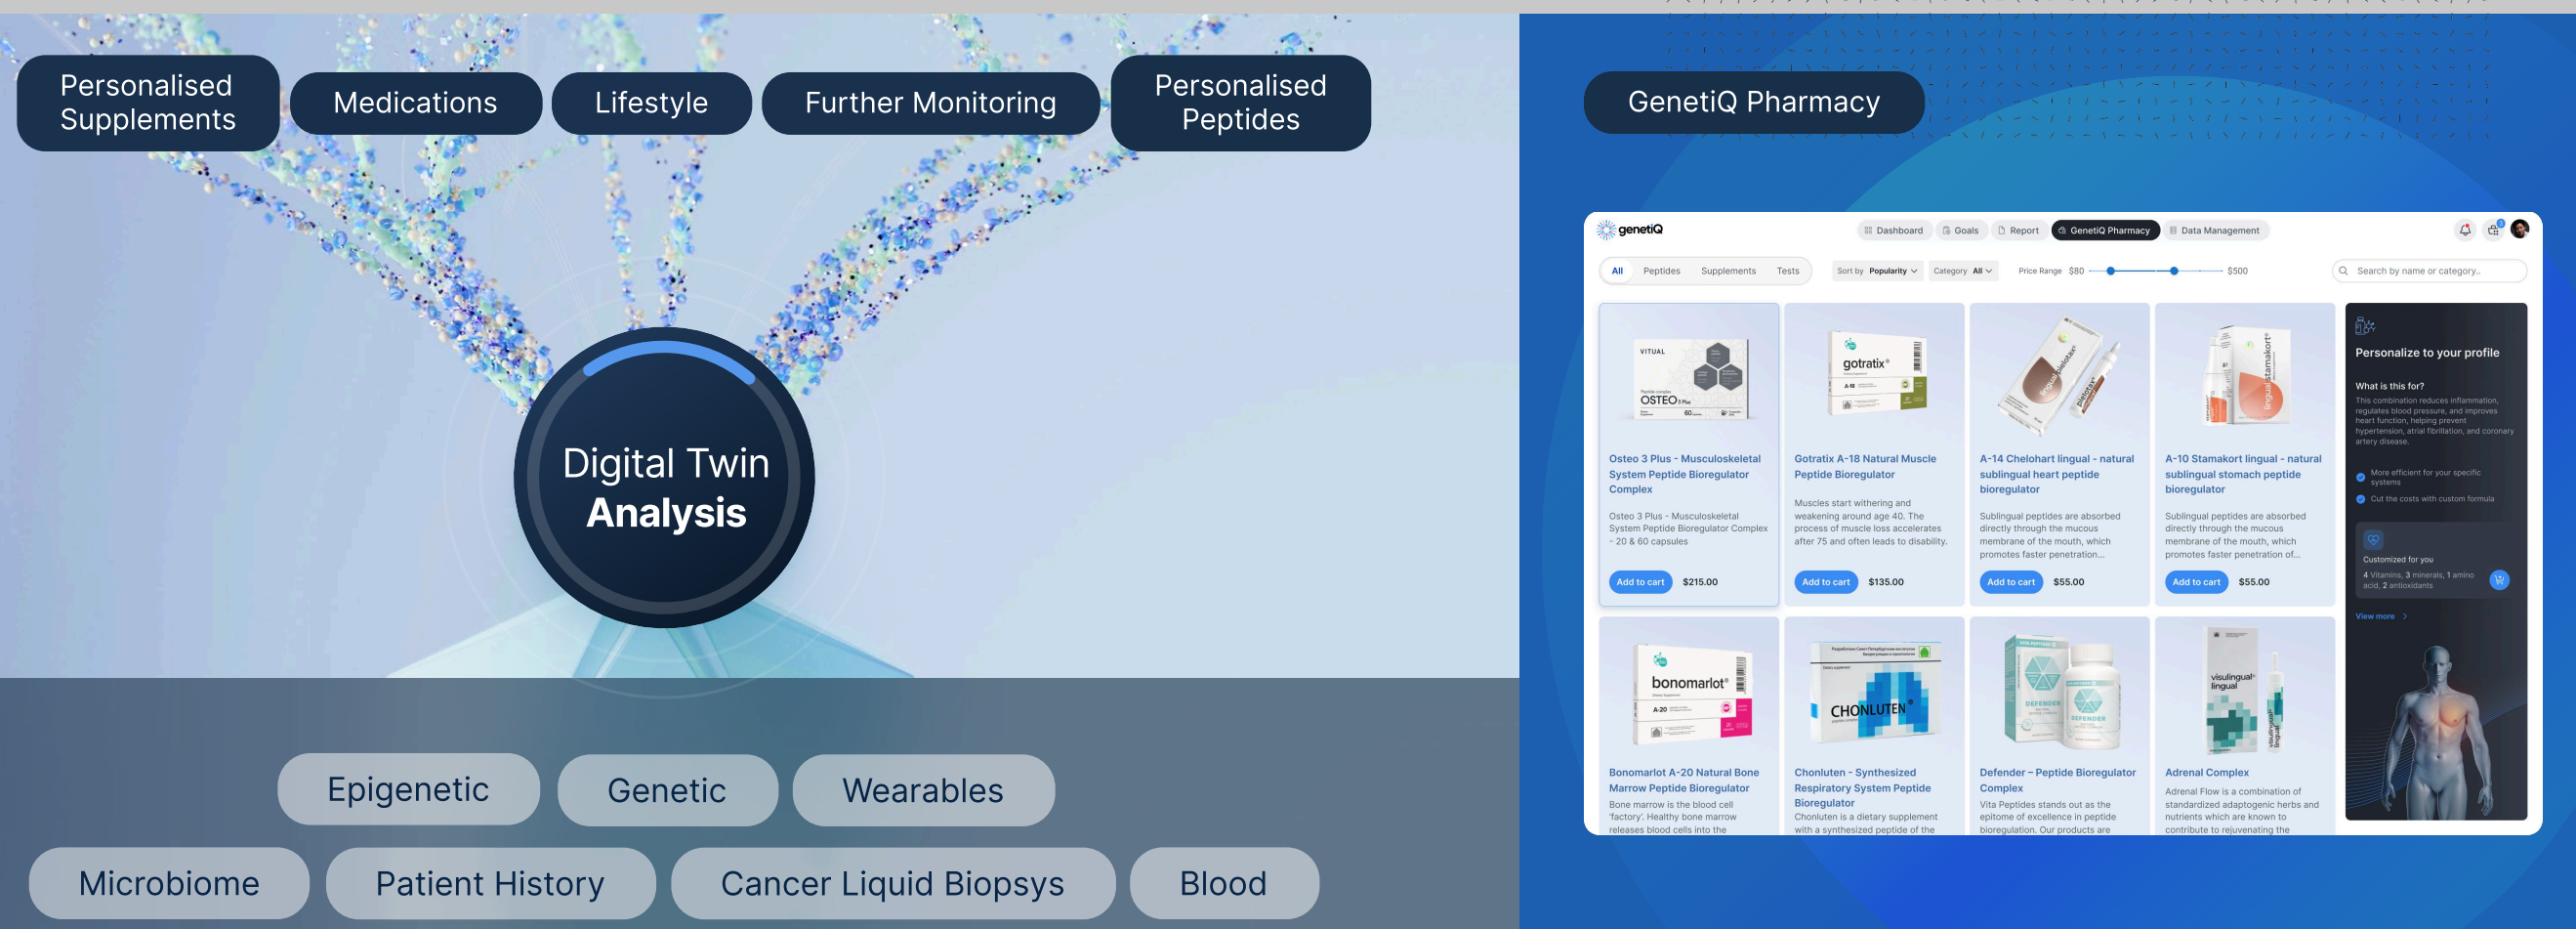

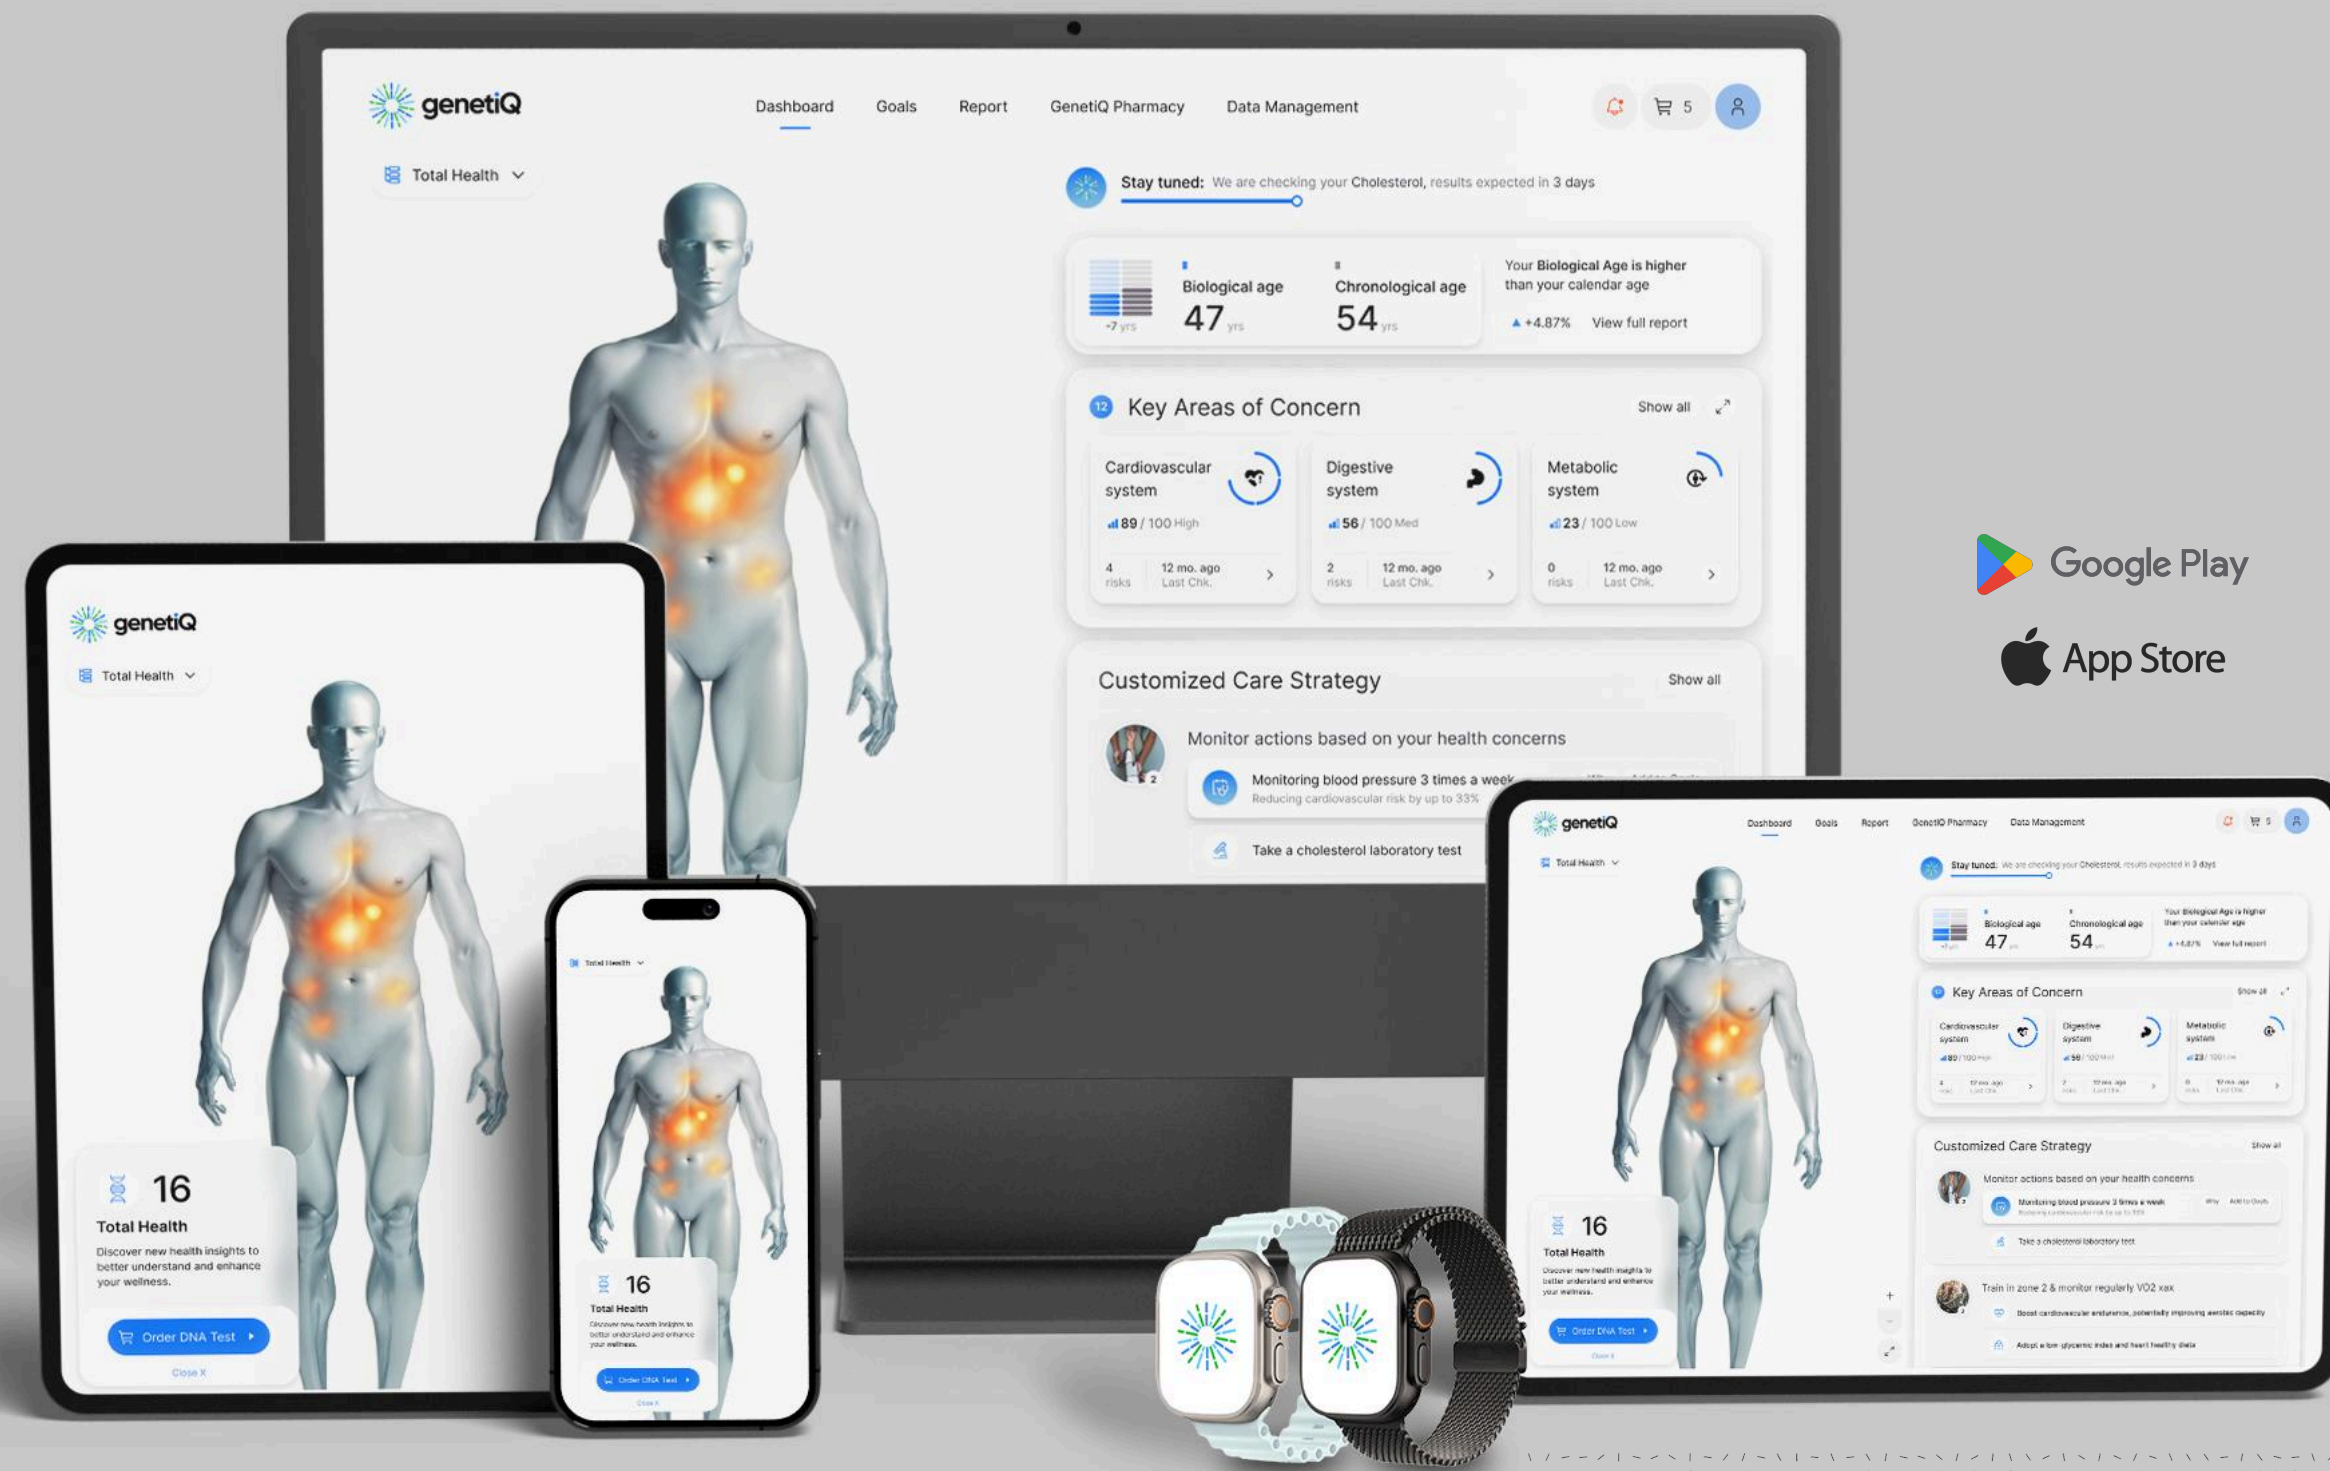

Investing in Medicine 3.0

Why It Matters:

- ⬢ Elevate your practice with personalized treatment strategies
- ⬢ Improve patient outcomes through cutting-edge predictive analytics
- ⬢ Access a global network of precision medicine specialists

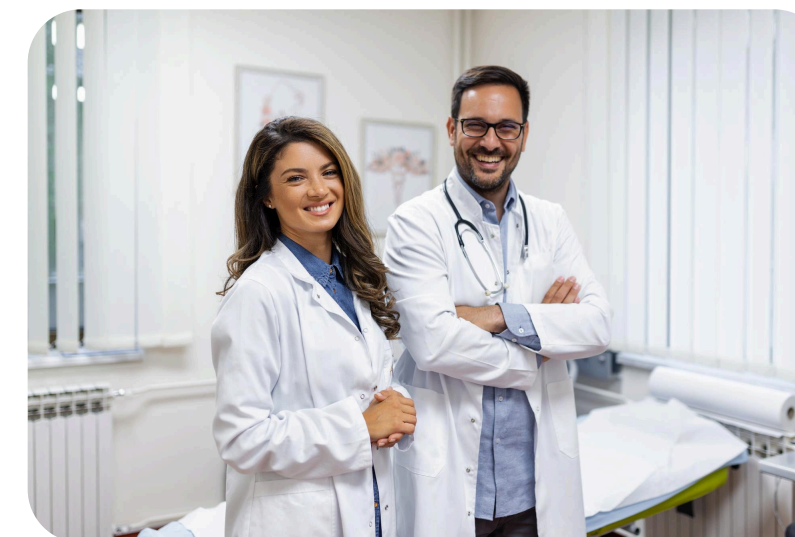

Empower your patients with AI-driven precision medicine. GenetiQ integrates multi-omics data, AI diagnostics, and real-time health tracking to personalize treatments.

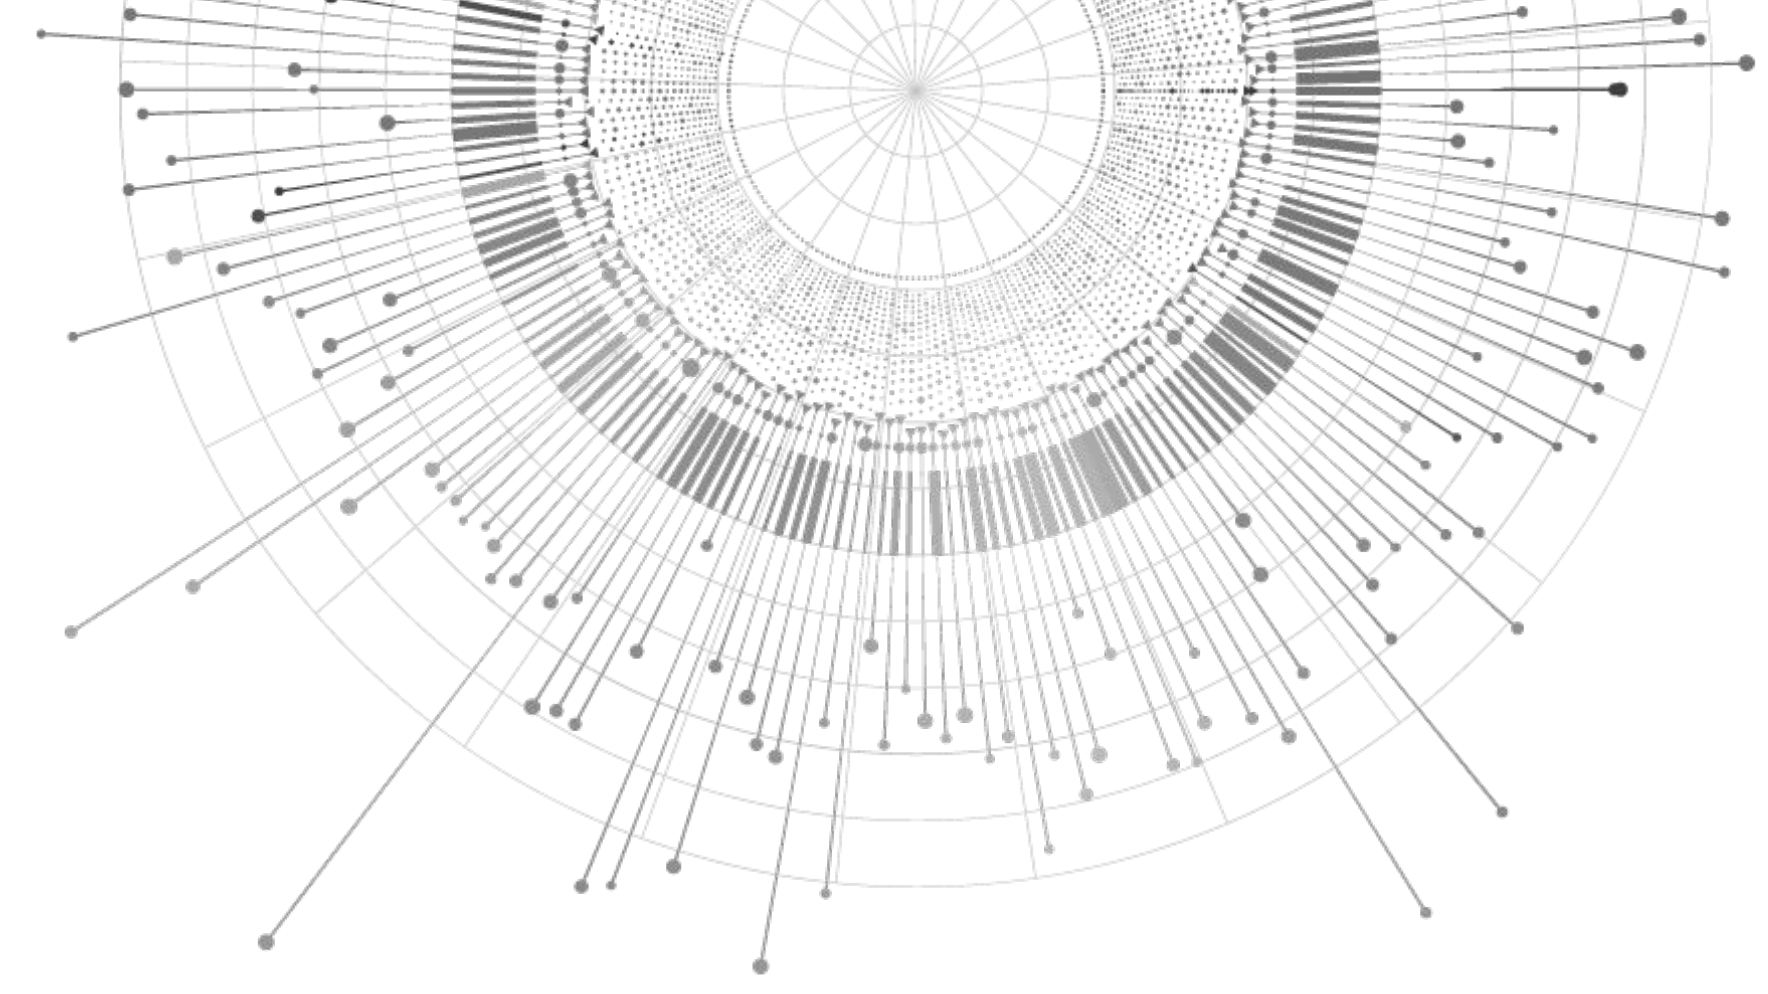

Upgrade Your Patient Care with AI-Powered Precision Health

- ⬢ Attract high-value patients seeking advanced longevity and disease prevention solutions
- ⬢ Increase patient engagement and retention with real-time, AI-powered health insights
- ⬢ Generate new revenue streams through integrated diagnostic serv

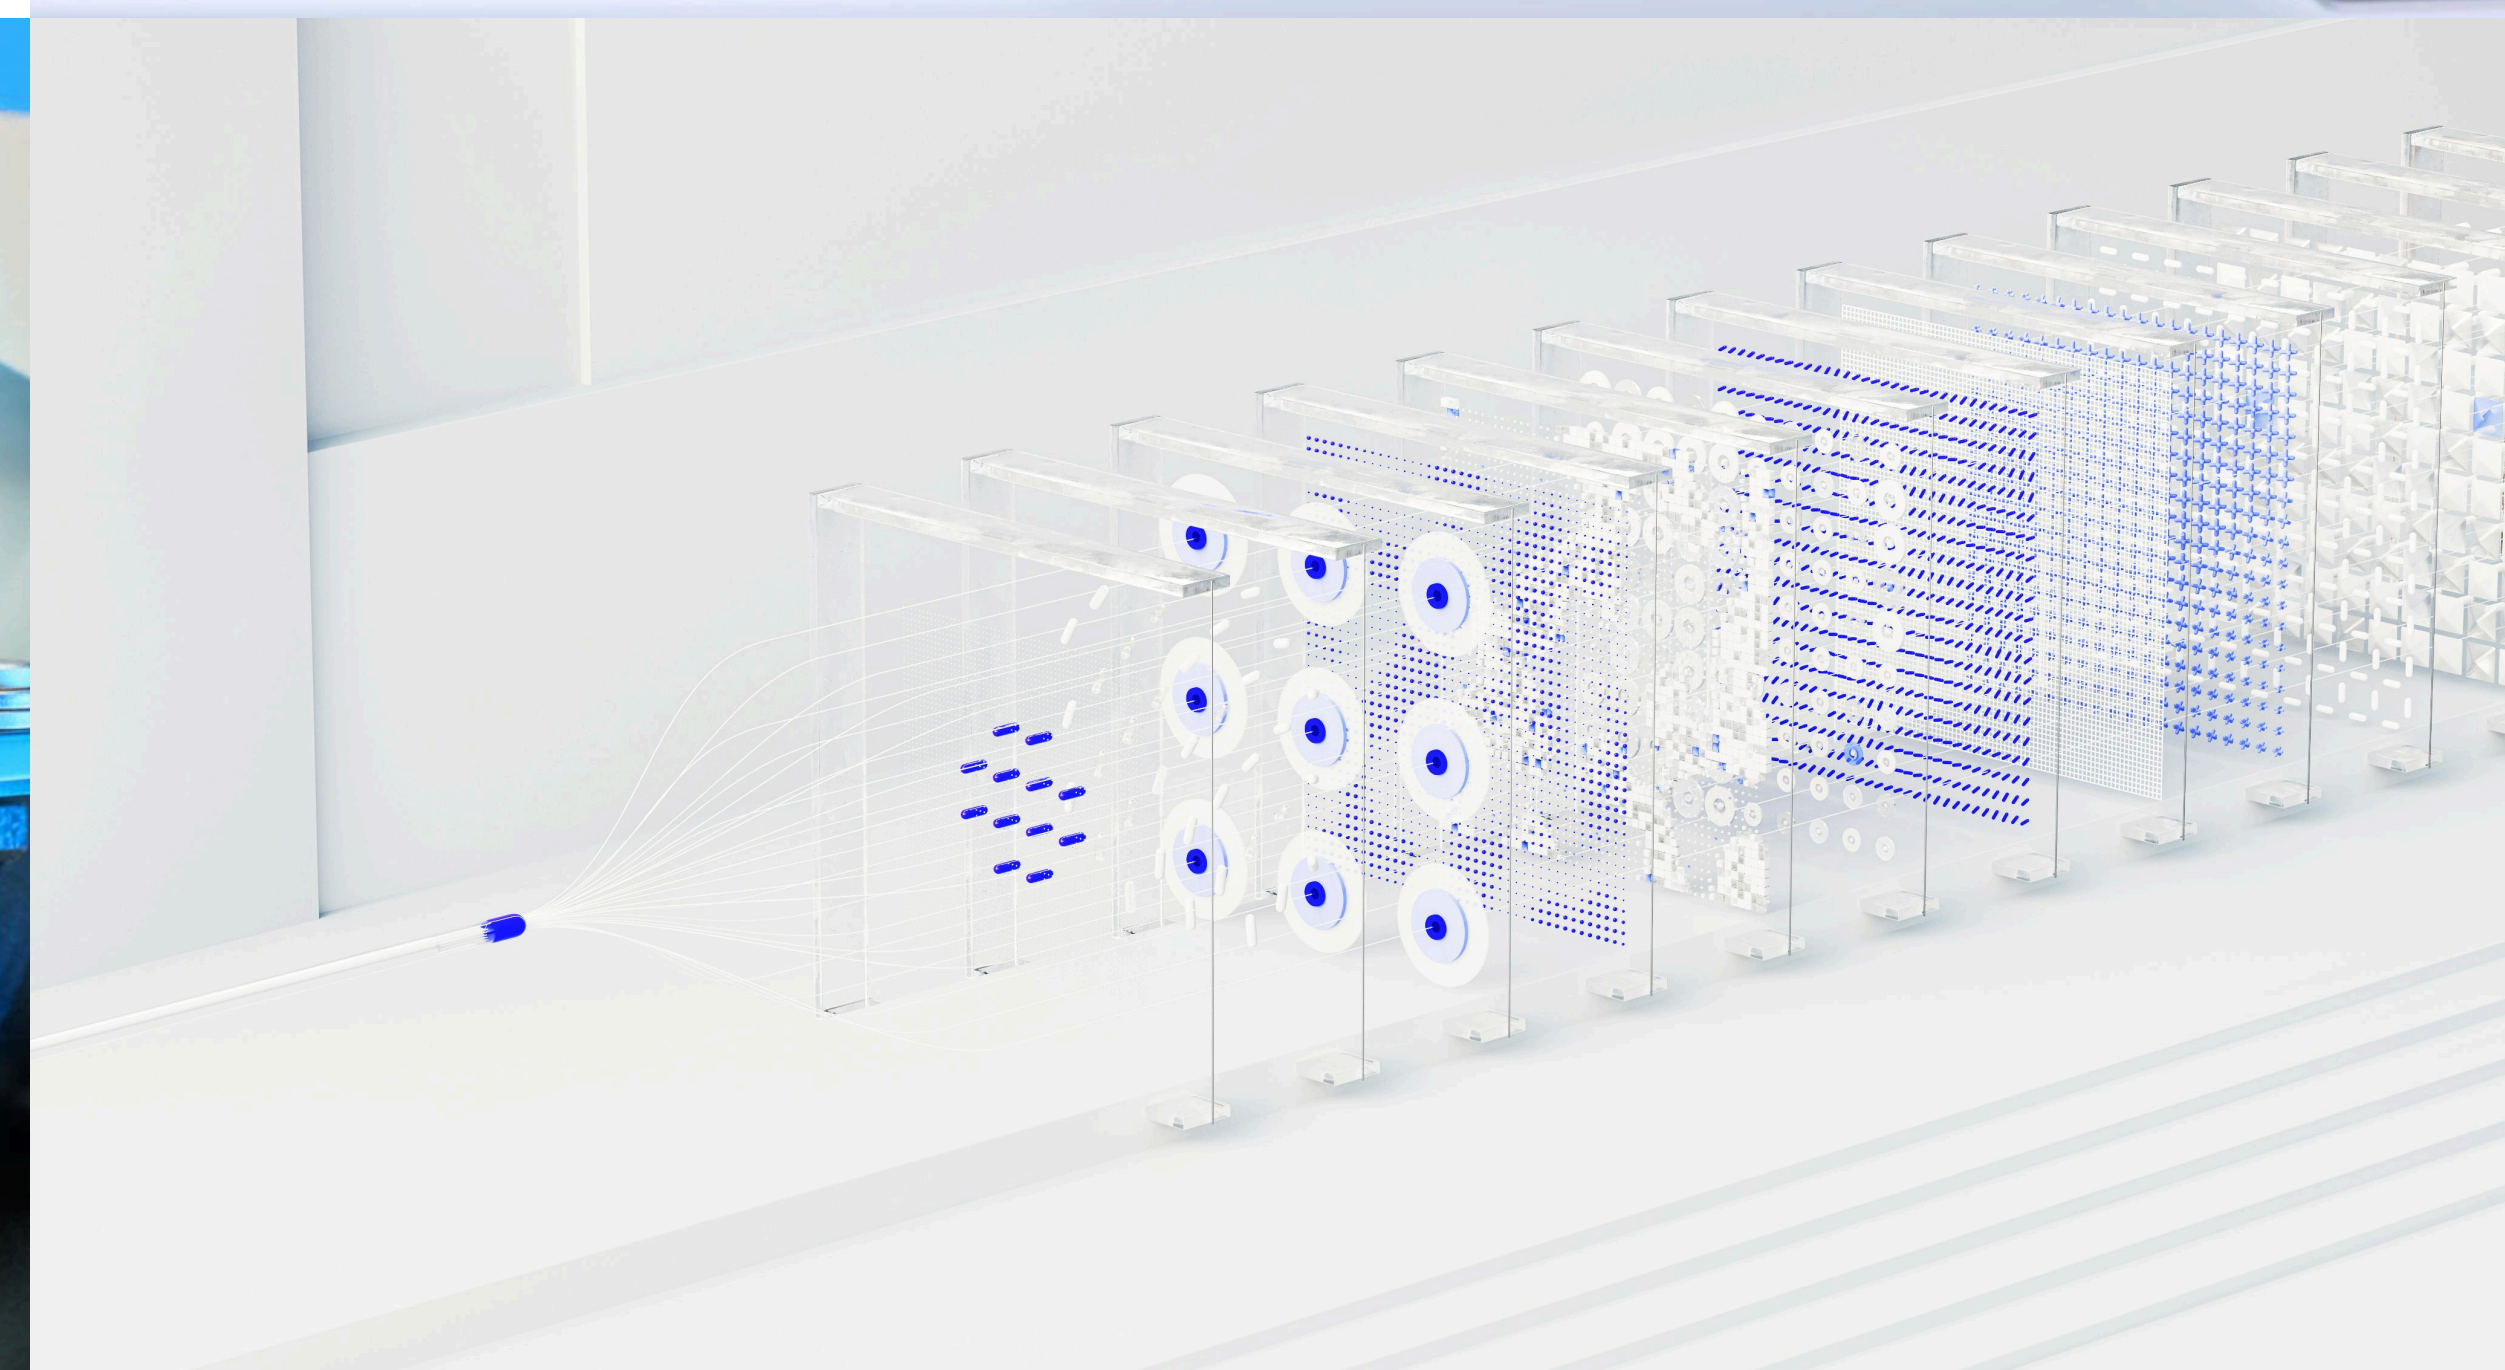

AI-Driven Precision Medicine for Institutions

- ⬢ Improve early disease detection and personalized treatment plans
- ⬢ Reduce healthcare costs through predictive analytics and preventative strategies
- ⬢ Integrate next-gen digital twin technology for real-time patient monitoring

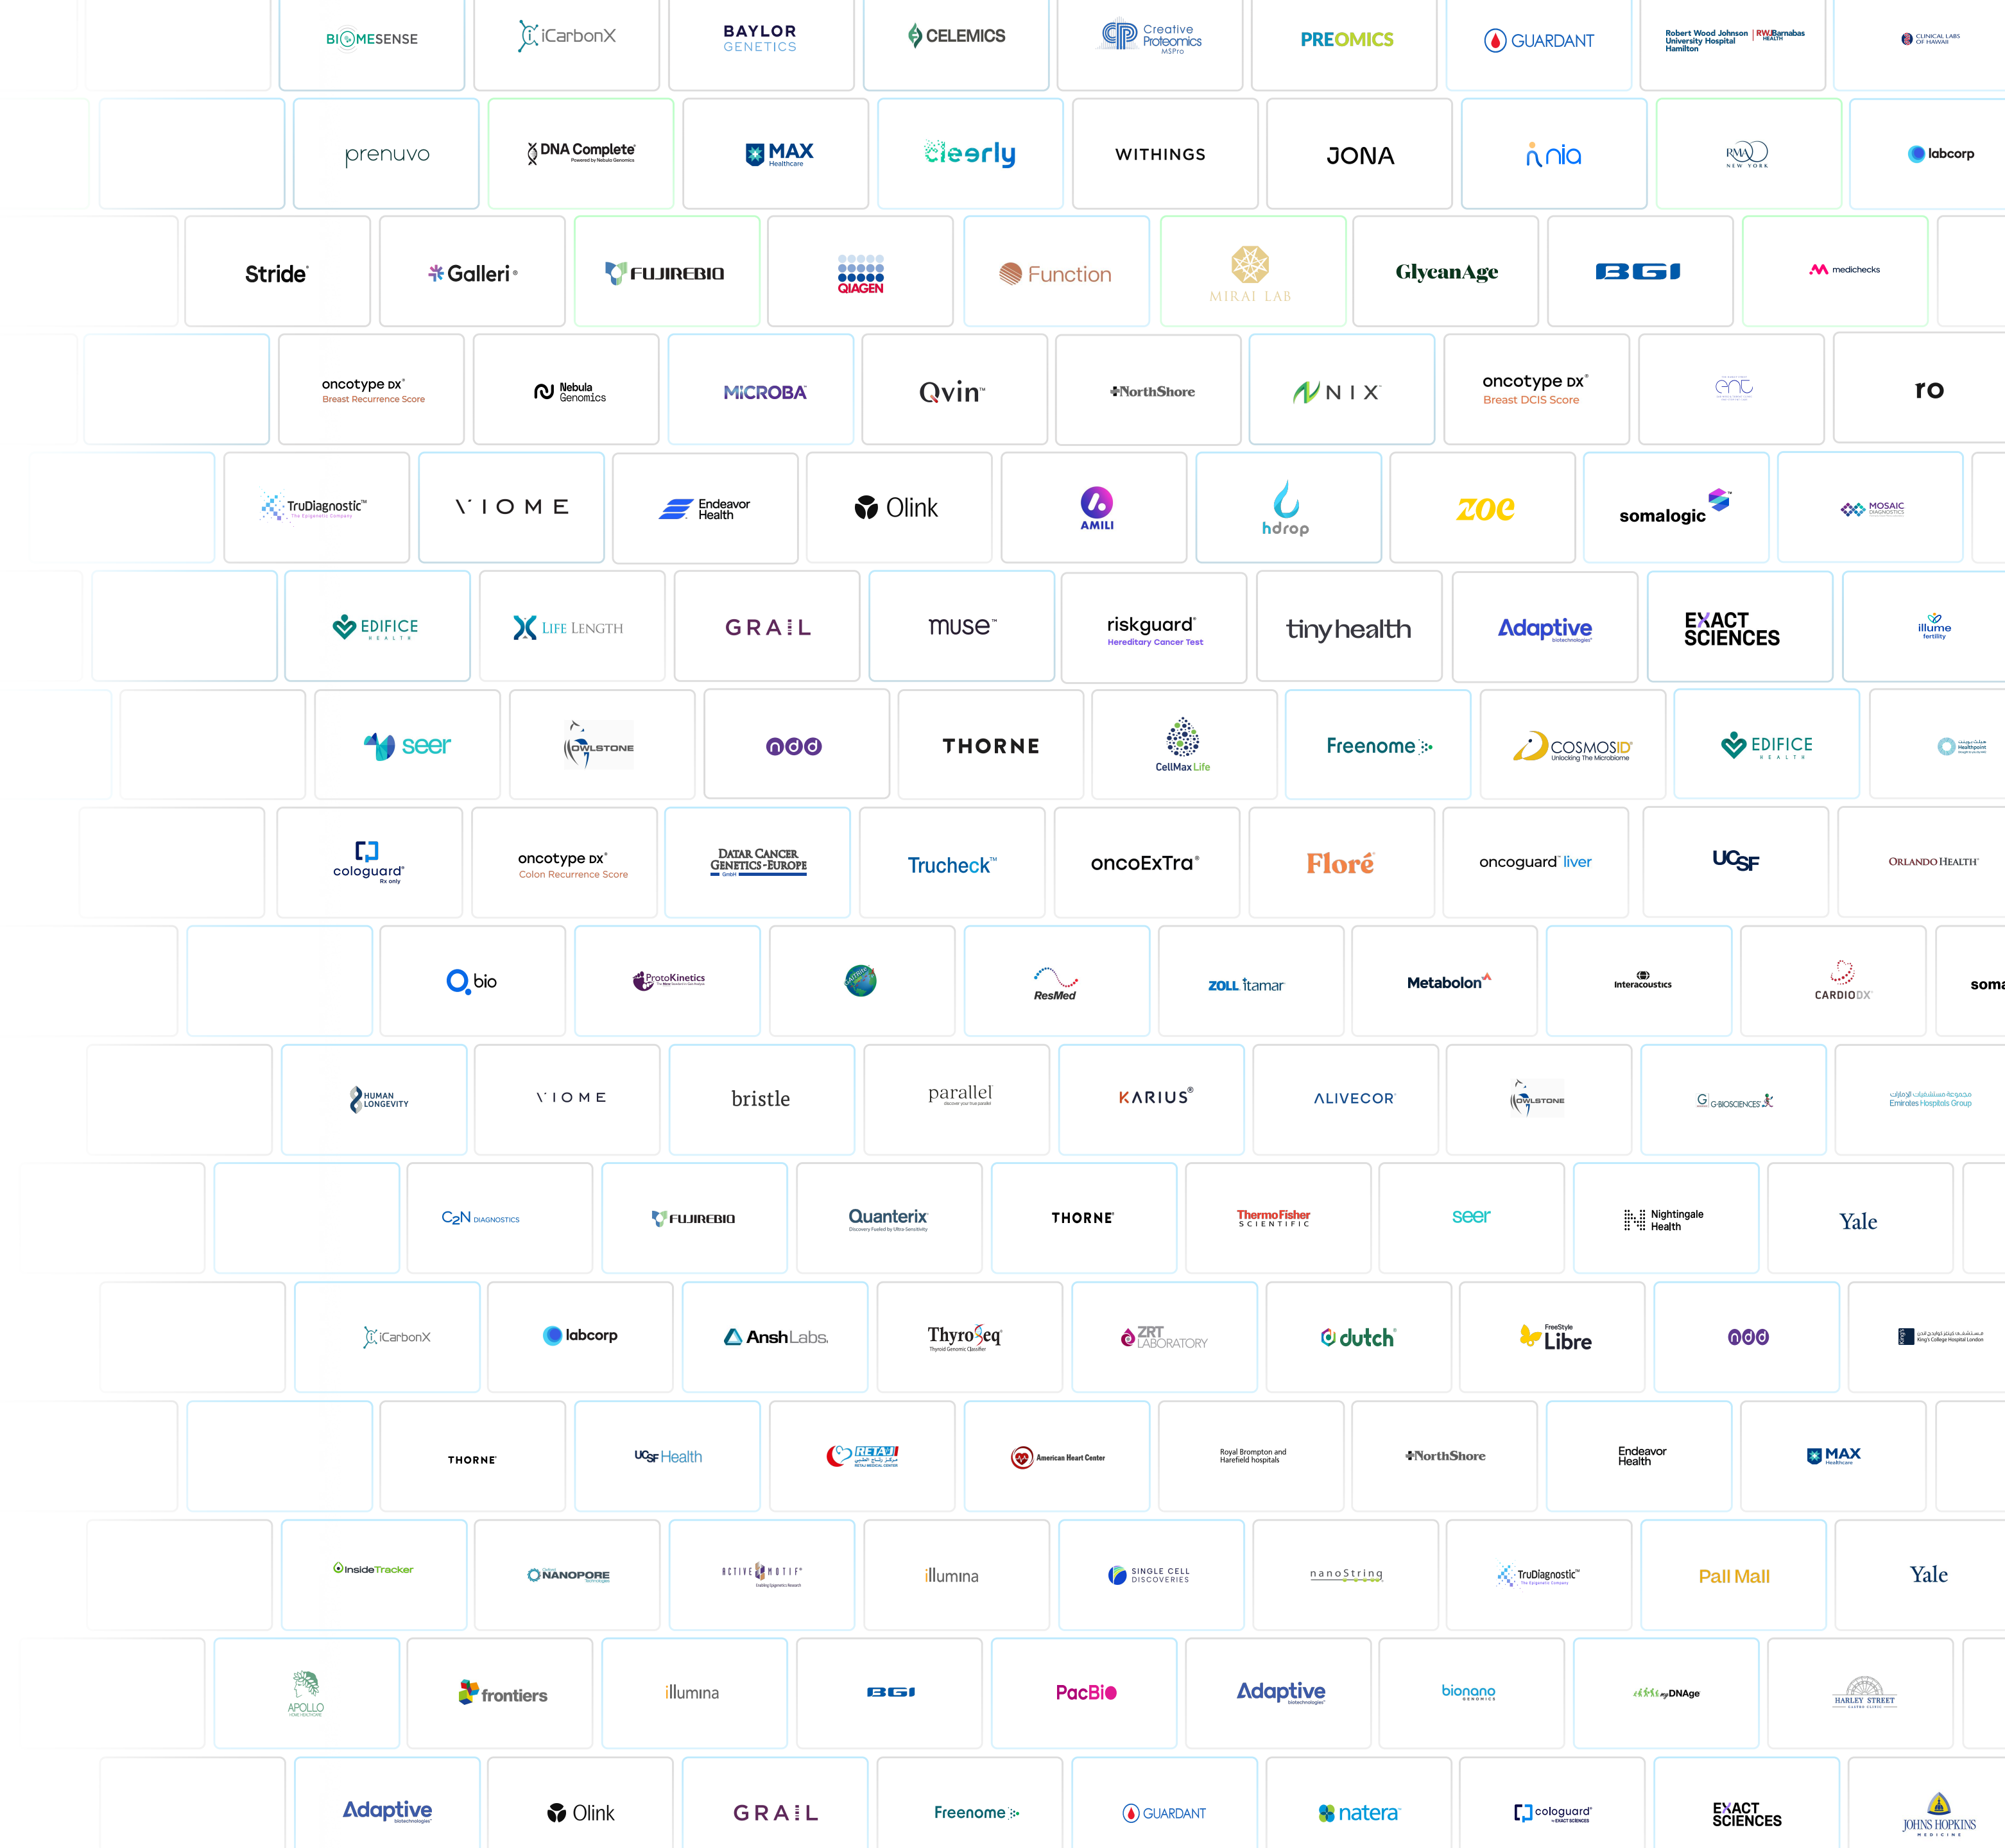

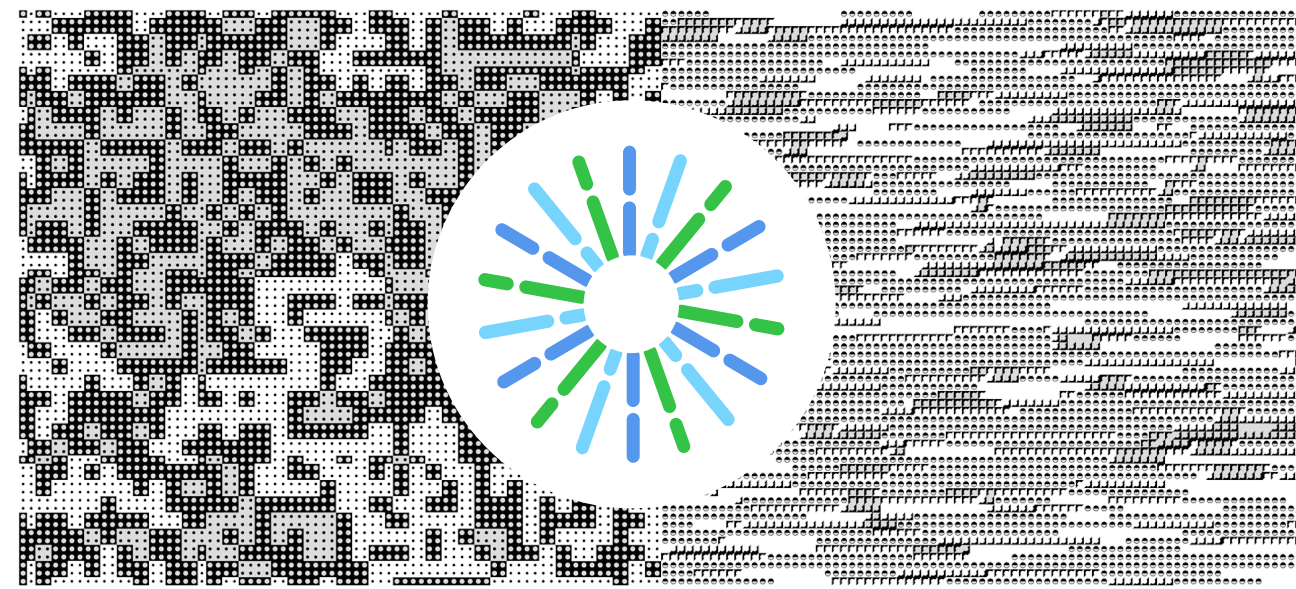

Expand Your Testing Business as a **GenetiQ** Partner

- ⬢ A consistent influx of patient samples from our global digital twin network
- ⬢ New revenue streams and higher test volumes
- ⬢ Exclusive early integration with the largest AI-powered diagnostic platform

Join the Largest Assay Library in the World

- Expand your reach with global clients through GenetiQ Digital Twin
- Earn recurring revenue from AI-driven diagnostics adoption
- Get ahead in the next frontier of precision diagnostics

Join us in shaping the future of personalized health.

Let's chat about how you can be a key ambassador and the face of precision health

The image displays several overlapping screenshots of the genetiQ user interface. The top-left screenshot shows a 'Cardiovascular System Report' with a progress bar for 'Today's goals' and a comparison of 'Cardiovascular age' (47 yrs) and 'Chronological age' (49 yrs). Below this, there are 'Key areas of concern' for Atherosclerosis, Ischemic Stroke, and Atrial Fibrillation (AF). The middle-left screenshot highlights 'Your Personal Supplements Mix' with categories like Cardiovascular, Digestive, and My personal formula, and lists 'Consider thymosin alp' and 'Take melanotan II'. The bottom-right screenshot shows a 'Total Health' dashboard with 'Biological age' (47 yrs) and 'Chronological age' (54 yrs), and lists 'Key Areas of Concern' such as Atherosclerosis, COPD, and Coronary Artery Disease. It also includes an 'Action Plan' with steps like 'Monitor actions based on your health concerns' and 'Lifestyle modifications for your health'. A notification for '16 New insights' is visible in the bottom left corner of the dashboard.
